

135SF SIDE FOLD

SPECS

Unique design allows this systems to conveniently fold sideways out of side and out of mind so other activities can take place without any interference or distraction. The side folding design is perfect for any facility with pre-existing equipment or building obstacles that may conflict with other suspended retractable basketball units, divider curtains, retractable batting cages, etc. The 134SF is available with electronic or manual operators. This system canalso be equipped with a Solo-Glide height adjuster so you can lower your backboard from 10' to 8'.
